

REBUILD YOUR MACHINE

Your existing Spiro® machine has served you well for many years but the lifetime for several vital parts, especially electronic components, may come to an end and impair your production capacity. In order to maintain the same service availability and in appreciation of being a long-term and loyal customer, Spiro® has developed a unique offer to rebuild your current machine with a complete upgrade. This refurbishment ensures ongoing and smooth duct production in your workshop - for years to come!

TUBEFORMER 2002 - ELECTRICAL UPGRADE

Exclusively for owners of the Tubeformer 2002 model we provide a complete electrical upgrade package, including a new fully equipped cabinet.

DUCTLINE - REBUILD CONTROL SYSTEM

Your old Ductline Control System can now be upgraded to the advanced Spiro® Control System that secures the availability of all electronic components and includes a user-friendly platform with many new features.

PLASMACUTTER FLORETT - REFURBISHMENT

Replace your existing electrical control unit with the new Spiro® HS v.3 Control System with latest technological components and advanced features.

CURVECUTTER - REBUILD CONTROL SYSTEM

Replace the existing electrical control of your old Curvecutter Delta machine with the new Spiro® Controller v.3.
