FITTINGSHAPER 1250

THE *Original* SINCE 1956

FITTINGSHAPER 1250

The Fittingshaper contributes vitally to reduce the leakage rate in the ventilation system, resulting in reduced energy consumption costs!

The patented machine designed to form the grooves for a rubber gasket, a stop bead, as well as clamping the gasket on the ends of fittings.

The Fittingshaper consists of a rigid frame on which 2 sledges with 2 rollers and 1 block with 1 counter-roller are mounted.

An additional sledge is almost vertically mounted and can move up and down with a specially shaped roller for clamping the gasket.

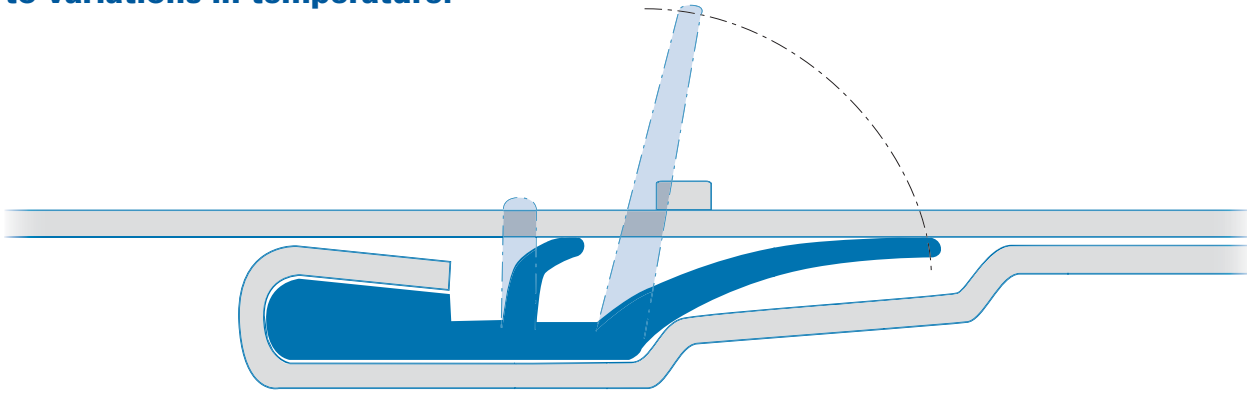

Technical Data

Diameter Range	125 - 1250 mm
Material Thickness	Galvanised steel 0.5 - 0.9 mm Stainless steel 0.5 - 0.8 mm
Hydraulic System	All drives & movements
Power Supply	5 kVA / 400V / 50 Hz

SPIRO[®] SYSTEM

The Leakproof and Energy Efficient Air Duct System incorporates a sealing strip of age-resistant EPDM rubber, ensuring an air tight and lasting joint seal, immune to variations in temperature.

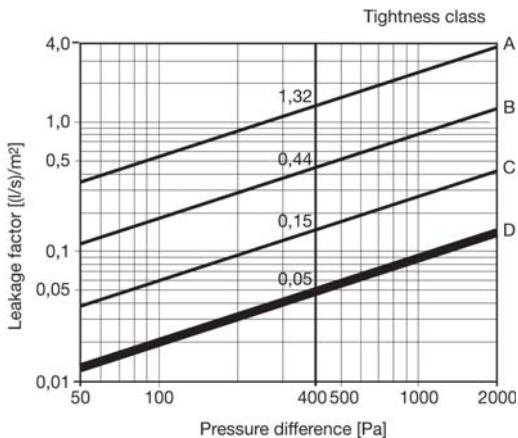

Unique Features

- » Fast and easy installation
- » Temperature resistant from -30°C to +100°C
- » Factory fitted gasket without any loose parts
- » Withstands positive pressure - 3000Pa
- » Adjustable - twisting and fine adjustment result in no risk of leakage
- » Environmentally Friendly - the system is fitted with solvent-free sealant
- » Can be installed in all kinds of weather

Double lip gasket for Spiro[®] System

Quick and easy change of diameter range

THE COMPLETE SOLUTION

MACHINES

Spiro[®] can provide you with a complete set of superior quality machines for the production of circular ducts and fittings.

AIR DUCT SYSTEMS

Spiro[®] has an extensive range of pre-fabricated fittings, ventilation and air-conditioning accessories that make a great addition to the products your business can offer.

SERVICES

Spiro[®] have the experience, in depth knowledge, support and aftermarket services that ensure your production is continuous and efficient.
