

**Combine the Fittingshaper 1250 & Spiro® Shaper to achieve the full dimension range of rubber gasket on your fittings!**

## FITTINGSHAPER 1250

The Fittingshaper contributes vitally to reduce the leakage rate in the ventilation system, resulting in reduced energy consumption costs!

The Fittingshaper is a flexible machine made for mounting rubber gaskets to fittings in small volumes but with many different sizes.

Patent No.: US 6,598,285 B1  
Patent No.: US 6,170,883 B1

Technical Data	
<b>Diameter Range</b>	125 - 1250 mm (5" - 50")
<b>Material Thickness</b>	0.5 - 0.9 mm (0.020" - 0.035") galvanized steel 0.5 - 0.8 mm (0.020" - 0.031") stainless steel
<b>Hydraulic System</b>	All drives & movements
<b>Power Supply</b>	5 kVA / 400V / 50 Hz (other voltage on request)
<b>Maximum Output</b>	2-gaskets (Ø300 mm) in less than 2 minutes

### Unique Features

- » Fast and easy installation
- » Factory fitted gasket without any loose parts
- » Temperature resistant from -30°C to +100°C
- » Withstands positive pressure - 3000Pa
