

GORELOCKER BETA 3

This is an original lockseam machine manufactured of high quality machine parts. A genuine product from the world's leading manufacturer of machines for the HVAC-industry.

Technical Data	
Diameter Range	125 - 1000 mm (5" - 40")
Material Thickness	0.4 - 1.25 mm (0.016" - 0.049") galvanized steel 0.4 - 0.8 mm (0.016" - 0.031") stainless steel 0.4 - 1.25 mm (0.016" - 0.049") aluminium
Flanging Speed	Max. 80 m/min. (262 fpm)
Maximum Output	20 bends/hour (4 segments – Ø 200 mm bend)
Electrical Connection	3x 400 V / 50 Hz / 4 kVA (other connections on request)

Switching from single flange to double flange operation requires a mere move of a handle. Changing from flanging operation to lockseaming operation requires only a few minutes. The machine can easily produce segment bends, reducers, end caps, offsets, etc.
